**We anticipate and develop
market trends in collaboration
with the most innovative brands
of bathroom furniture and
sanitary ware.**

pensare in modo logico. think logic.

Siamo leader europei OEM nello sviluppo e nella produzione di prodotti in solid surface e cast marble; siamo riconosciuti in tutto il mondo per la nostra qualità e servizio.

We are the OEM European leader in the development and production of solid surface and cast marble products; we are recognised worldwide for quality.

gruppo industriale.

industrial group.

Azienda OEM per B2B

Siamo leader europei nello sviluppo e nella produzione di prodotti in solid surface e cast marble. Siamo riconosciuti in tutto il mondo per le forniture OEM (Original Equipment Manufacturer) di alta qualità. Operiamo nel B2B, approvvigionandoci di materiali di altissima qualità per produrre lavabi, piatti doccia e vasche da bagno per i nostri partner di prodotto standard, su misura e private label/custom. In 20 anni siamo cresciuti in risposta agli sviluppi del mercato dell'arredo bagno, aprendo linee di produzione di nuova generazione, ampliando la nostra offerta e migliorando il nostro servizio logistico in tutta Europa.

OEM company for B2B

We are the European leader in the development and production of solid surface and cast marble products. We are recognised worldwide for high quality OEM (Original Equipment Manufacturer) supply. We operate in B2B, sourcing the highest quality materials to create washbasins, shower trays and baths for our partners seeking standard, bespoke and private label products. Over 20 years we have grown in response to developments in the bathroom furniture market, opening new generation production lines, expanding our offer and improving our logistical positioning across Europe.

Capacità produttiva annuale

Continuiamo ad investire risorse significative in automazione, software e logistica per gestire al meglio il mercato.

Annual production capacity

We continue to invest significant resources in automation, software and logistics to better manage the market.

la nostra storia. our history.

Crescita costante nel mondo dell'arredo bagno Constant growth in the world of bathroom furniture

2000	Il Gruppo Europak acquista Nicos, specializzata nella realizzazione di componenti in poliuretano, e crea la nuova società Nicos International SpA.	The Europak Group acquires Nicos International, specialising in the manufacture of polyurethane components and creates the new company, Nicos International International SpA.
2003	Viene aperta la sede di Portobuffolè di 16.400 m² (Unit 1).	Nicos International moves in the new headquarters of 16,400 sqm.
2005	Viene inaugurata in Bulgaria la Bulsan, una fabbrica di 9.000 m² per la produzione di 50.000 lavabi all'anno in Mineralmarmo® lucido.	Bulsan is inaugurated in Bulgaria, a 9,000 sqm factory for the production of 50,000 Mineralmarmo® washbasins per year.
2007	La superficie di Bulsan è raddoppiata, passando da 9.000 a 18.000 m².	Bulsan's surface area is doubled from 9,000 to 18,600 sqm.
2009	In Bulsan, la capacità produttiva di lavabi su misura viene ulteriormente aumentata di 50.000 pezzi.	In Bulsan, the production capacity of custom-made washbasins is further increased by 50,000 pcs.
2011	La capacità produttiva di Bulsan viene portata ad un totale 150.000 lavabi all'anno, inserendo anche il Mineralmarmo® in finitura opaca (Mineralsolid).	Bulsan's production capacity is increased to a total of 150,000 washbasins per year, including Mineralmarmo® in a matt finish.
2012	Viene aperta la prima filiale logistica spagnola a Barcellona.	Bulsan opens new Spanish warehouse in Barcelona.
2015	Reshoring della linea di piatti doccia dalla bulgara Bulsan allo stabilimento italiano di Portobuffolè (Unit 1), con un nuovo impianto di produzione automatizzato.	Reshoring of the shower tray line from Bulsan in Bulgaria to the Italian plant in Portobuffolè, with a new automated production plant.
2016	A Portobuffolè (Unit 1) viene completato l'impianto automatizzato e realizzato il magazzino verticale automatico per 7.000 piatti doccia.	In Portobuffolè the automated system is completed and the automatic vertical warehouse for 7,000 shower trays is built.
2018	Lo stabilimento di Prata di Pordenone (Unit 2) viene ampliato a 20.000 m² per ospitare le nuove linee di produzione dei prodotti in solid surface.	The Prata di Pordenone plant is expanded to 20,000 sqm to accommodate new production lines for solid surface products.
2019	Avviamento della seconda linea di produzione di piatti doccia a Portobuffolè (Unit 1) per una capacità produttiva annua di 150.000 pezzi Avviamento di una nuova linea di produzione per lavabi e vasche da bagno in solid surface a Prata di Pordenone (Unit 2).	Start-up of a second shower tray production line in Portobuffolè with an annual production capacity of 150,000 pcs. Start-up of a new production line for solid surface washbasins and bathtubs in Prata di Pordenone.
2022	Avviamento di una nuova linea di produzione per lavabi in cast marble per una capacità produttiva annua di 200.000 pezzi.	Start-up of a new production line for cast marble washbasins with an annual production capacity of 120,000 pcs.
2024	Messa in funzione di una nuova linea produttiva di lavabi "su misura" in solidsurface per una capacità produttiva annua di 37.000 pezzi.	Start up of a new production line for bespoke basins in solidsurface with an annual production capacity of 37.000 pieces.

materiali.
materials.

Due famiglie di materiali ecologici, riutilizzabili e virucidi.

Nei nostri laboratori la ricerca di nuove soluzioni è costante: formulazioni di mescole sempre più performanti, trattamenti di cariche, sistemi innovativi di polimerizzazione e trattamento delle superfici. Il nostro team di ricerca collabora con università e laboratori esterni, per ottenere risultati sempre migliori, garantiti dalle più importanti certificazioni internazionali; la nostra produzione soddisfa le vigenti norme di settore: CE per Unione Europea, UKCA per Gran Bretagna ed Irlanda del Nord e C-UPC per USA e Canada; tutti i nostri materiali hanno poi conseguito anche la certificazione “Greenguard Gold Certificate” conferita da UL in merito al contenuto di COV (composti organici volatili). Dal 2020, uno specifico studio e la revisione delle formulazioni hanno portato tutti i nostri materiali a poter essere definiti virucidi e antibatterici.

Two families of
eco-friendly materials,
reusable and virucidal.

In our laboratories, research into new solutions is constant: increasingly high-performance compound formulations, charge treatments, innovative polymerization systems, and surface treatments. Our research team collaborates with universities and external laboratories to achieve ever better results, ensuring important international certifications. Our production complies with current regulations in the sector: CE for the European Union, UKCA for Great Britain and Northern Ireland, and C-UPC for the USA and Canada; all our materials have also obtained the “GREENGUARD Gold Certificate” awarded by UL with regard to VOC (volatile organic compound) content.

Since 2020, a specific study and revision of formulations have enabled all our materials to be defined as virucidal and antibacterial.

solid surface

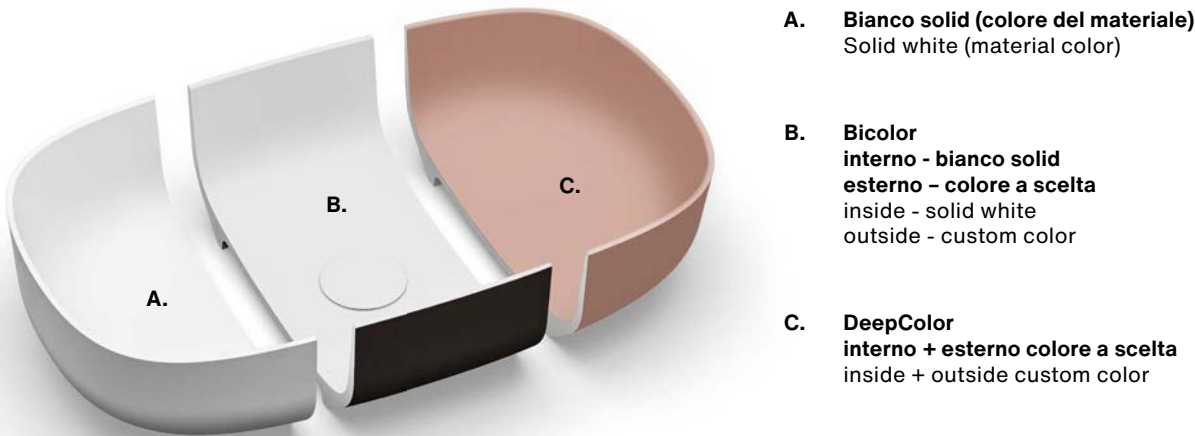

solid

Con il famoso effetto “soft touch” e una bellezza simile alla pietra naturale levigata, il nostro solid surface è composto da cariche minerali - principalmente triidrato di alluminio - legate a resine naturali Biobased derivanti da colture biologiche, prevalentemente di natura vegetale. Le esclusive formulazioni, messe a punto nei nostri laboratori, sono igieniche, setose, resistenti, stampabili, facilmente lavorabili.

With its signature soft-touch effect and the refined beauty of polished natural stone, our solid surface is composed of mineral fillers –primarily aluminum trihydrate –combined with Biobased natural resins derived from organic, primarily plant-based sources. Our exclusive in-house formulations are hygienic, silky to the touch, durable, moldable, and easily workable.

Bianco solid / Bicolor / DeepColor

bianco opaco | matt white

È un materiale composito costituito per 2/3 da triidrato di alluminio, mescolato magistralmente con resine poliestere modificate con monomeri acrilici dalle alte prestazioni chimico-fisiche. Questo porta ad avere un materiale omogeneo e uniforme in tutto lo spessore. Le principali caratteristiche di questo prodotto sono la compattezza, la resistenza agli agenti chimici e solventi oltre che al graffio; inoltre, data l'uniformità in tutto lo spessore, eventuali danneggiamenti possono essere facilmente rimossi utilizzando una spugna abrasiva per rinnovarne così la superficie.

It is a composite material made of 2/3 aluminum trihydrate, expertly blended with polyester resins modified with high-performance acrylic monomers. The result is a homogeneous, uniform material throughout its entire thickness. Its main features include compactness, resistance to chemicals and solvents, and scratch resistance. Thanks to its full-thickness uniformity, any surface damage can be easily removed using an abrasive sponge, effectively restoring the original finish.

verniciatura opaca | matt painting

La nostra tecnologia di verniciatura opaca rappresenta una soluzione di alto livello per l'arredo bagno, in grado di unire estetica, durabilità e praticità. Si tratta di una vernice bicomponente acrilico-poliuretanica con pigmenti selezionati a finire. La natura alifatica delle resine assicura resistenza all'ingiallimento nel tempo, mentre la componente acrilica garantisce resistenza alle sollecitazioni termiche per l'ambiente bagno. L'applicazione a spruzzo consente di ottenere superfici omogenee, compatte e piacevoli al tatto, valorizzando sia linee piane che superfici curve.

Our matt paint technology represents a high-level solution for bathroom furniture, combining aesthetics, durability, and practicality. It is a two-component acrylic-polyurethane pigment finish paint. Its aliphatic nature ensures resistance to yellowing over time, while the acrylic component provides strength against thermal stress, making it ideal for domestic bathroom environments. The spray application allows for homogeneous, compact, and pleasant-to-the-touch surfaces, enhancing both flat lines and curved shapes, even in areas directly exposed to water.

Le caratteristiche principali sono:

- Uniformità cromatica
- Ampia gamma di colori disponibili (NCS INDEX, RAL K5 Classic esclusi metallizzati, colori personalizzati a richiesta)
- Ottima adesione e impermeabilità superficiale
- Resistenza a raggi UV, macchie, urti e shock termici
- Facilità di pulizia e mantenimento nel tempo.

Main features:

- Color uniformity
- Wide range of available colors (NCS INDEX, RAL K5 Classic excluding metallics, custom colors available on request)
- Excellent adhesion and surface waterproofing
- Resistance to UV rays, stains, impacts, and thermal shock
- Easy to clean and maintain over time

Finiture disponibili:

Bicolor opaco

Ideale per chi desidera un tocco di colore senza rinunciare alla morbidezza del solid surface. La verniciatura viene applicata esclusivamente sulla superficie esterna del prodotto, mantenendo l'interno bianco per un elegante contrasto estetico.

Available finishes:

Bicolor matt

Ideal for those who want a touch of color without giving up the brightness and softness of solid surface. The coating is applied exclusively on the external surface of the product, keeping the interior white to create an elegant aesthetic contrast.

DeepColor opaco

La stessa tecnologia di verniciatura viene applicata sia all'interno che all'esterno del prodotto, creando un effetto sartoriale di colore pieno, compatto e uniforme. Una soluzione dal design moderno e distintivo, pensata per chi vuole personalizzare completamente il proprio ambiente bagno.

DeepColor matt

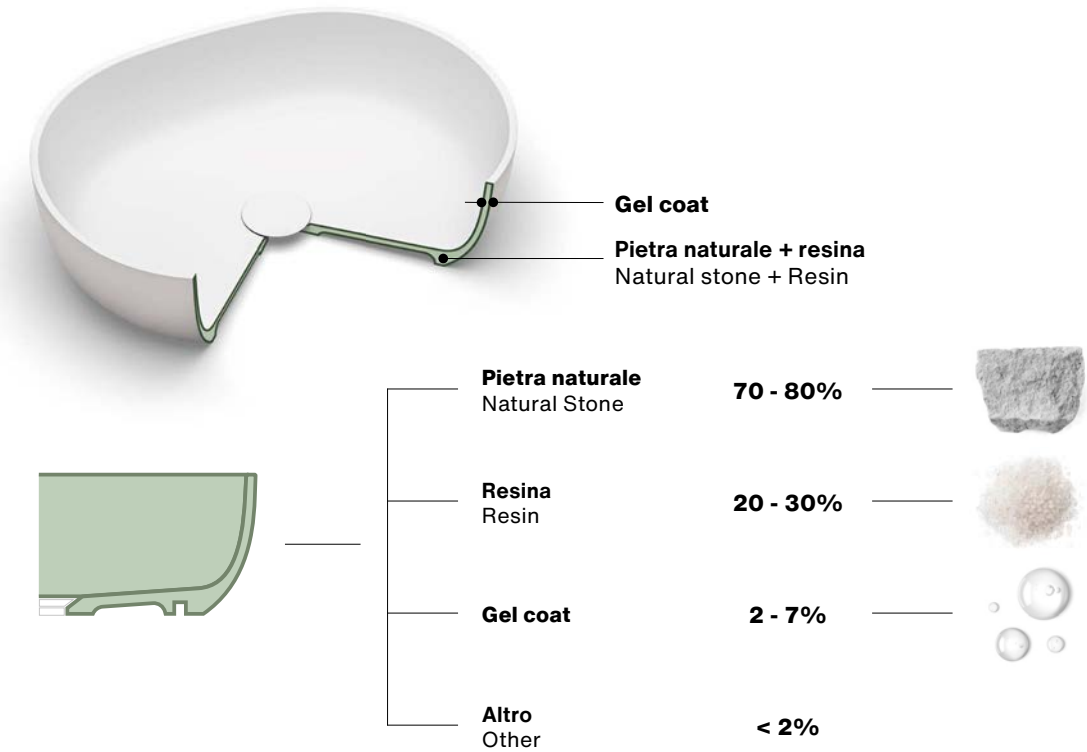

The same coating technology is applied both inside and outside the product, creating a tailor-made effect of full, compact, and uniform color. A modern and distinctive design solution, conceived for those who want to completely customize their bathroom environment.

cast marble

mineralmarmo®

I nostri prodotti in cast marble rappresentano un’alternativa evoluta alla ceramica tradizionale, grazie a una resistenza meccanica superiore anche con spessori ridotti. Inoltre, consentono la realizzazione di elementi di grandi dimensioni mantenendo tolleranze minime tra lotti di produzione non ottenibili con altri materiali come la ceramica, l’acrilico e il vetro. Il nostro Mineralmarmo® è composto da cariche minerali naturali e resina poliestere ed è rivestito da uno smalto tecnico (gelcoat) in poliestere acrilato che garantisce una finitura lucida o opaca di alta qualità. Mineralmarmo® è un materiale molto versatile che permette lo sviluppo di molte forme: lavandini con sottosquadra, piani, basamenti, colonnine.

Our cast marble products offer an advanced alternative to traditional ceramic, thanks to their superior mechanical strength, even at reduced thicknesses. They also allow for the production of large-format elements with minimal tolerances between production batches, a level of precision not achievable with materials like ceramic, acrylic, or glass. Our Mineralmarmo® is composed of natural mineral fillers (calcium carbonates) and polyester resin. It is coated with a technical gelcoat based on acrylatedpolyester, delivering a premium glossy or matt finish, while offering enhanced technical performance. Mineralmarmo® is a highly versatile material that allows for the creation of a wide variety of shapes: undercut washbasins, countertops, bases, and columns.

bianco lucido | glossy white

La finitura lucida del Mineralmarmo® è ottenuta tramite un sofisticato ciclo di lavorazione che prevede due fasi successive: lucidatura e brillantatura dello smalto tecnico in poliestere acrilato (gelcoat) che riveste il materiale. Questo trattamento conferisce al materiale un aspetto brillante, elegante e durevole, ideale per l’ambiente bagno. Le elevate proprietà meccaniche e chimiche, unite all’estetica raffinata, rendono il Mineralmarmo® lucido la scelta perfetta per soluzioni progettuali di qualità.

The Mineralmarmo® glossy surface finish is achieved through a sophisticated production process involving two consecutive steps: polishing and brightening of the technical polyester acrylate coating (gelcoat) that covers the material. Thistreatment gives the surface a brilliant, elegant, and long-lasting appearance, making it ideal for bathroom environments. Its excellent mechanical and chemical properties, combined with a refined aesthetic, make Glossy Mineralmarmo® the perfect choice for high-quality design solutions.

bianco opaco | matt white

La finitura opaca del Mineralmarmo® è ottenuta tramite la carteggiatura dello smalto tecnico in poliestere acrilato (gelcoat) che riveste la superficie, utilizzando carta abrasiva P320. Questo trattamento conferisce al materiale un aspetto opaco, elegante e contemporaneo, mantenendo intatte le eccellenti caratteristiche meccaniche e chimiche che lo rendono ideale per l’ambiente bagno. La finitura opaca di Mineralmarmo® si presta perfettamente a soluzioni d’arredo dal design moderno e minimale.

The Mineralmarmo® matt finish is achieved by sanding the polyester acrylate technical coating (gelcoat) with P320 grit abrasive paper. This process gives the surface a smooth, elegant, and contemporary matt look, while preserving the excellent mechanical and chemical properties that make it ideal for bathroom applications. Mineralmarmo®’s matt finish is perfectly suited for modern and minimalist design solutions.

verniciatura opaca | matt painting

Per il Mineralmarmo® viene adottata la stessa tecnologia di verniciatura opaca impiegata per il solid: una soluzione di alto livello per l’arredo bagno che coniuga estetica, durabilità e praticità. La vernice è una bicomponente acrilico-poliuretanica con pigmenti selezionati a finire: la natura alifatica delle resine assicura resistenza all’ingiallimento nel tempo, mentre la componente acrilica garantisce stabilità alle sollecitazioni termiche. L’applicazione a spruzzo consente di ottenere superfici omogenee, compatte e piacevoli al tatto, valorizzando sia linee piane che superfici curve.

For Mineralmarmo®, we apply the same advanced matt paint technology used for solid: a premium solution for bathroom furnishings that blends refined aesthetics, long-lasting performance, and everyday practicality. This high-quality finish is a two-component acrylic-polyurethane paint with selected pigments. The aliphatic nature of the resins ensures excellent resistance to yellowing over time, while the acrylic component provides outstanding stability under the thermal stresses typical of bathroom environments. Applied by spray, the coating delivers a uniform, compact surface with a pleasant tactile feel, enhancing both flat profiles and curved forms.

- Le caratteristiche principali sono:
- Uniformità cromatica
 - Ampia gamma di colori disponibili (NCS INDEX, RAL K5 Classic esclusi metallizzati, colori personalizzati a richiesta)
 - Ottima adesione e impermeabilità superficiale
 - Resistenza a raggi UV, macchie, urti e shock termici
 - Facilità di pulizia e mantenimento nel tempo.

- Main features:
- Color uniformity
 - Wide range of available colors (NCS INDEX, RAL K5 Classic excluding metallics, custom colors available on request)
 - Excellent adhesion and surface waterproofing
 - Resistance to UV rays, stains, impacts, and thermal shock
 - Easy to clean and maintain over time.

cast marble

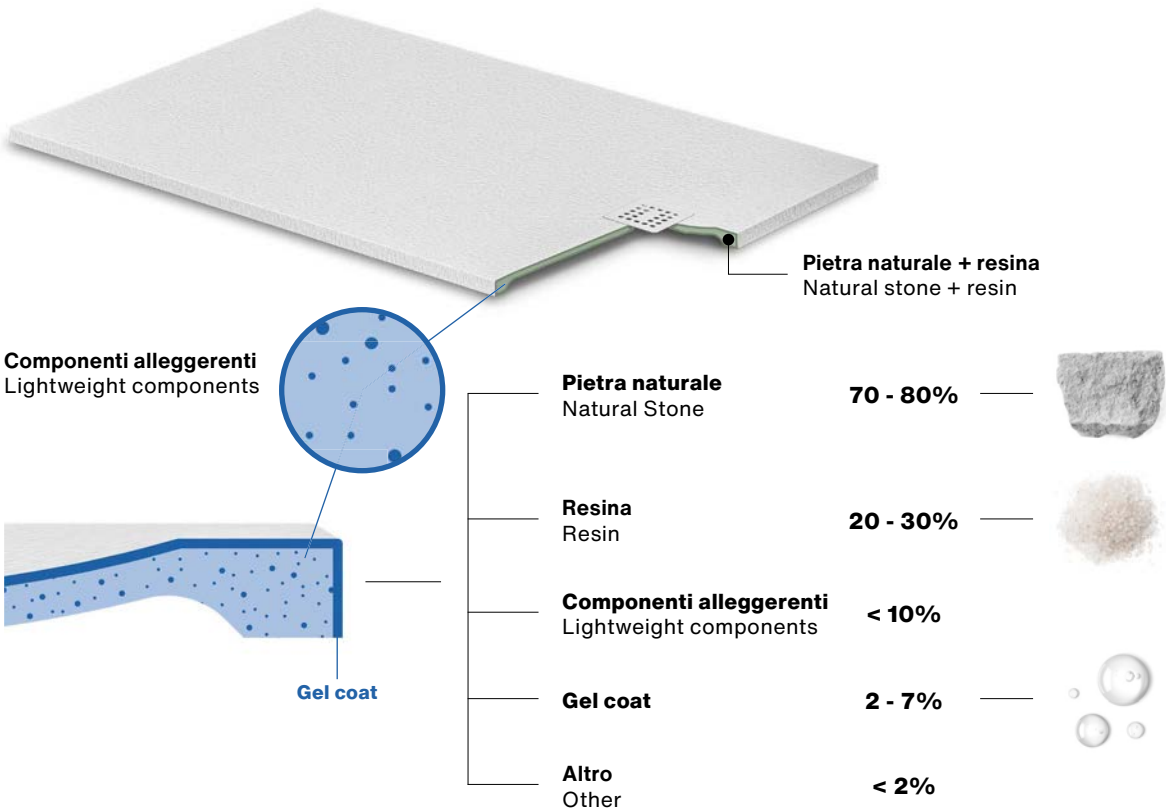

mineralmarmo® light

Mineralmarmo® Light è l'evoluzione alleggerita del nostro storico Mineralmarmo®: un materiale composito avanzato formato da cariche minerali naturali, componenti alleggerenti e resina poliestere, rivestito da uno smalto tecnico opaco (800-1000 µm) ad elevate prestazioni. Frutto di un lungo lavoro di ricerca sull'equilibrio ottimale tra resistenza e peso, Mineralmarmo Light consente una riduzione fino al 20% del peso rispetto ai prodotti tradizionali presenti sul mercato, mantenendo inalterate le prestazioni meccaniche e superficiali. Il risultato è un materiale più maneggevole, efficiente e sostenibile, progettato per semplificare movimentazione, posa e logistica senza compromessi su qualità, durabilità e ripristinabilità della superficie.

Mineralmarmo® Light is the lightweight evolution of our traditional Mineralmarmo®: an advanced composite material made of natural mineral fillers, lightweight components and unsaturated polyester resin, coated with a high-performance matt technical gelcoat (800-1000 µm). Developed through extensive research to achieve the optimal balance between strength and weight, Mineralmarmo® Light allows up to 20% weight reduction compared to conventional products on the market, while maintaining the same mechanical and surface performance. The result is a more manageable, efficient and sustainable material, designed to simplify handling, installation and logistics without compromising.

- Principali vantaggi:**
- **Riduzione di peso fino al 20% nei piatti con fondo cavo e nervature di rinforzo**
 - **Stessa resistenza meccanica e superficiale del Mineralmarmo® tradizionale**
 - **Smalto tecnico opaco ad alta resistenza e completamente ripristinabile**
 - **Ottimizzazione logistica: più pezzi per pallet, minori costi di trasporto e riduzione CO₂**
 - **Versatilità dimensionale▪ Made in Italy**
 - **Certificazioni: CE / UKCA / c-UPC / GREENGUARD Gold**

- Main features:**
- Up to 20% weight reduction (hollow base with reinforcement ribs)
 - Same mechanical and surface resistance as traditional Mineralmarmo®
 - Matt technical coating, fully restorable
 - Logistic optimization: more pieces per pallet, lower transport costs and CO₂ reduction
 - Dimensional versatility
 - Made in Italy
 - Certified: CE / UKCA / c-UPC / GREENGUARD Gold

bianco opaco | white matt

Mineralmarmo® Light è attualmente utilizzato per la collezione Folk, la prima linea di piatti doccia in finitura pietra sviluppata con questo innovativo materiale. Disponibile in finitura bianco opaco, unisce leggerezza strutturale e prestazioni elevate per un'esperienza di installazione più semplice e una qualità invariata nel tempo.

Mineralmarmo®Light is currently used for the Folk collection, the first shower tray line with a stone-effect finish developed using this innovative material. Available in a matt white finish, it combines structural lightness with high performance, ensuring easier installation and long-lasting quality over time.

Prodotti B2B standard

Abbiamo un’ampia gamma di piatti doccia, lavabi e vasche da bagno, tutti personalizzabili per dimensioni, finiture e colori. Lavoriamo esclusivamente nel settore B2B e la nostra esperienza nel solid surface e nel cast marble è il miglior supporto per i nostri clienti.

Standard B2B products

We have a wide range of shower trays, wash basins and baths, all customizable in size, finish and colours. We work exclusively in the B2B sector, and our experience in solid surface and cast marble, for which we are European leaders is the best support for our customers.

Prodotti personalizzati

Per le aziende di arredo bagno e i più famosi marchi internazionali, realizziamo prodotti con materiali propri sviluppando stampi su misura, garantendo ai partner che si affidano a noi il giusto lotto minimo.

Bespoke products

For bathroom furniture companies and most famous international brands, we manufacture products with our own materials developing bespoke moulds, guaranteeing partners who rely on us the right minimum lot.

Private label

La nostra esperienza OEM comprende la produzione di piatti doccia, vasche da bagno e lavabi per il segmento Private Label, per partner di tutto il mondo. Il know-how dei nostri laboratori e del nostro ufficio tecnico è a disposizione per qualsiasi richiesta.

Private label

Our OEM expertise includes the manufacture of shower trays, bathtubs and washbasins, which we also produce for the Private Label segment, for partners around the world. The know-how of our laboratories and our technical department is available for any request.

sostenibilità ambientale. sustainability.

Nicos International è sensibile alle tematiche della sostenibilità e ha avviato un percorso di analisi e di conoscenza profonda del proprio processo produttivo per poter evidenziare quali possano effettivamente essere dei punti, non solo di miglioramento, ma anche di svolta.

Grazie all'analisi EPD "Cradle to Gate" condotta sui nostri impianti produttivi, è emerso come un potenziale gap iniziale sul consumo di tonnellate equivalenti di CO₂ dato da materie prime legate ai processi di raffinaria rispetto ai materiali "tradizionali" quali la ceramica, possa facilmente essere mitigato processando i nostri articoli a temperatura ambiente, minimizzando il più possibile gli scarti e riutilizzando questi ultimi in altri ambiti, quale ad esempio il drenaggio dei sottofondi stradali.

Analogamente nelle produzioni di cast marble il consumo di energia elettrica e termica risulta essere inferiore di ben oltre il 90% rispetto all'energia impiegata per produrre un analogo articolo in materiale ceramico.

Capire l'importanza delle singole azioni, siano esse semplici o strategiche per il bene dell'azienda, dei propri collaboratori, dei propri partners, è il primo passo per comprendere il nostro ruolo e la nostra responsabilità. Approfittando delle riflessioni maturate dall'esperienza del COVID19, abbiamo deciso di accelerare mettendo al centro della nostra strategia la sostenibilità in tutte le sue sfaccettature, per una società e per un pianeta migliore da lasciare alle nuove generazioni.

Nicos International is sensitive to sustainability issues and has started a process of analysis and knowledge deep into its production process in order to highlight which ones can actually be topics, not only of improvement, but also of turning point.

Thanks to the EPD "Cradle to Gate" analysis carried out on our production plants, it emerged as a potential initial gap in the consumption of equivalent tons of CO₂ given by raw materials linked to refinery processes compared to "traditional" materials such as ceramics, can easily be mitigated by processing our items at room temperature, minimizing waste as much as possible and reusing the latter in other areas, such as the drainage of road sub-bases. Similarly, in cast marble production, the consumption of electrical and thermal energy is well over 90% less than the energy used to produce a similar item in ceramic material.

Understanding the importance of individual actions, whether simple or strategic for the good of the company, our collaborators, our partners, is the first step to understand our role and our responsibility. Taking advantage of the reflections gained from the experience of COVID19, we have decided to accelerate placing sustainability in all its facets at the centre of our strategy, for a society and for a better planet to leave to new generations.

produciamo energia pulita. we produce clean energy.

Da gennaio 2020, abbiamo un impianto fotovoltaico da 73,080 kWp, con una produzione annuale di 79.657 kWh (1.090 kWh/kWp), pari ad un abbattimento annuale di 55,8 tonnellate di CO₂. L'energia in esubero negli stabilimenti produttivi, sotto forma di calore, viene recuperata in diversi modi: l'aria calda prodotta dai compressori viene recuperata per riscaldare l'acqua degli impianti tecnici e il calore dell'acqua delle caldaie viene impiegato per alimentare le unità di trattamento d'aria dei forni di post-curing.

Tutti gli uffici sono dotati di sistemi di climatizzazione con pompa di calore per l'ottimizzazione del confort ambientale e l'abbattimento delle emissioni di CO₂.

Since January 2020, we have a 73,080 kWp photovoltaic system, with an annual production of 79,657 kWh (1,090 kWh/kWp), equivalent to an annual reduction of 55.8 tons of CO₂. The energy excess heat in production plants is recovered in various ways: air hot water produced by the compressors is recovered to heat the water in the technical systems and the heat from the boiler water is used to power the air handling units of the furnaces post-curing.

All offices are equipped with air conditioning systems with heat pump to optimize the environmental comfort and the reduction of CO₂ emissions.

utilizziamo resine Biobased
e plastica riciclata.
we use Biobased resins
and recycled plastic.

Abbiamo scelto di adottare politiche di sostenibilità concrete: oltre ad essere l'unica azienda al mondo a produrre materiali Biobased, possiamo anche offrire la possibilità di produrre lavabi in cast marble con resine contenenti anche PET riciclato.

Tutti possono assumere un atteggiamento sostenibile cercando di allungare il ciclo di vita dei vari materiali, plastica compresa, evitando di gettare le cose dopo un singolo utilizzo, ma separando e recuperando correttamente i rifiuti. Noi, come azienda, sperimentiamo continuamente nuove tecnologie in grado di valorizzare il recupero, ottimizzando i processi e cercando alternative possibili alla salvaguardia dell'ambiente.

We have chosen to adopt concrete sustainability policies: in addition to being the only company in the world to produce Biobased materials, we can also offer the possibility of producing cast marble sinks with resins also containing recycled PET.

Everyone can adopt a sustainable attitude by trying to extend the life cycle of various materials, including plastic, avoiding throwing things away after a single use, but separating and properly recovering waste. We, as a company, are continuously experimenting with new technologies capable of enhancing recovery, optimising processes and seeking possible alternatives to safeguard the environment.

pensare in modo sostenibile.
think green.

ARIA
dal 2012 i nostri materiali hanno la certificazione internazionale Green Guard Gold relativa alle emissioni di composti organici volatili in ambienti chiusi, contribuendo al rating LEED (Leadership in Energy and Environmental Design). I nostri prodotti vengono esaminati annualmente da un laboratorio terzo.

AIR
from 2012 our materials received the international Green Guard Gold certification relating to emissions of volatile organic compounds in closed environments, contributing to the LEED certification rating. The data and subsequent certification are reviewed annually by a third-party laboratory.

RIUTILIZZO
Il team di ricerca Nicos International sta portando avanti diversi studi per poter riutilizzare nel processo primario e/o nei processi secondari gli sfridi di produzione, sia solidi che polvirulenti.

REUSE
Nicos International research team is carrying out several studies to be able to reuse in the primary process and/or in secondary processes the production waste, both solid and powdery.

RIFIUTI
Il 95% dei rifiuti prodotti negli stabilimenti Nicos International viene recuperato in altre filiere produttive.

WASTE
95% of waste produced in Nicos International plants is recovered in other manufacturing chains.

ENERGIA
Nicos International, in quanto impresa energivora, conduce periodicamente audit energetici volti all'ottimizzazione del consumo di energia elettrica e gas naturale dei propri processi. Dal 2024 ci approvvigioniamo di energia da fonti rinnovabili, dimostrando così il proprio impegno nell'ambito della decarbonizzazione."

ENERGY
Nicos International, as an energy-intensive company, leads periodic energy audits aimed at the optimisation of the electricity consumption and natural gas from its processes. From 2024 we we supply energy from renewable sources, thus demonstrating their commitment in the field of decarbonisation."

MATERIALI
Dal 2020 il solid surface viene prodotto con resine di origine biogenica a rapido rinnovamento riducendo al massimo l'utilizzo di quelle di origine fossile.

MATERIALS
Since 2020, solid surface has been produced with resins of biogenic origin with rapid renewal, reducing to a minimum the use of those of fossil origin.

Marcatura CE | CE marking

La marcatura CE fa riferimento al Regolamento Europeo 305/2011 per i prodotti da costruzione. Questo regolamento stabilisce i criteri di tracciabilità e conformità delle diverse categorie di prodotti da costruzione. Vasche, lavabi, piatti doccia devono soddisfare specifici requisiti tecnici sia progettuali che prestazionali, essere corredati da una Dichiarazione di Prestazione (DoP) ed essere etichettati CE. A seguito della Brexit, per Gran Bretagna ed Irlanda del Nord i prodotti devono essere marcati UKCA.

The CE marking refers to the European Regulation 305/2011 for products from construction. This regulation establishes the traceability and conformity criteria of the various categories of construction products. Bathtubs, sinks and shower trays must meet specific technical and design requirements that performance, be accompanied by a Declaration of Performance (DoP) and be CE labelled. Following Brexit, for Great Britain and Northern Ireland products must be UKCA marked.

Certificazione C-UPC | C-UPC certification

La certificazione C-UPC è richiesta per esportare prodotti sanitari in Nord America: designato come Standard di riferimento, lo Uniform Plumbing Code (UPC) è un codice modello sviluppato dall’International Association of Plumbing and Mechanical Officials (IAPMO) per fornire indicazioni sulle caratteristiche di installazione e conseguentemente di ispezione di un impianto idraulico, utile a promuovere la salute, la sicurezza e il benessere degli utilizzatori. Il C-UPC nasce per fornire ai consumatori sistemi idraulici sicuri e igienici, lasciando comunque spazio all’innovazione e alle nuove tecnologie. Un prodotto non certificato C-UPC non può di fatto essere commercializzato in Canada e/o USA. Tutti i prodotti, i materiali e le finiture Nicos International sono certificati C-UPC e quindi valevoli per essere commercializzati sia in Canada che USA.

The C-UPC certification is required to export healthcare products to North America: designated as a reference standard, the Uniform Plumbing Code (UPC) is a model code developed by the International Association of Plumbing and Mechanical Officials (IAPMO) to provide indications on the installation characteristics and consequently on the inspection of a plumbing system, useful for promoting the health, safety and well-being of users. The C-UPC was created to provide consumers with safe and hygienic plumbing systems, while still leaving space for innovation and new technologies. A product that is not C-UPC certified cannot made to be marketed in Canada and/or USA. All Nicos International products, materials and finishes are C-UPC certified and therefore valid for being marketed both in Canada that USA.

Certificazione UL GREENGUARD | UL GREENGUARD certification

La maggior parte dell’esposizione quotidiana delle persone agli agenti chimici avviene attraverso l’aria che respiriamo nelle nostre case, uffici, scuole e altri ambienti interni. Questi agenti aerodispersi sono comunemente indicati come composti organici volatili (COV). I prodotti che utilizziamo per costruire, arredare, ma anche pulire i nostri ambienti interni possono avere un impatto significativo sui livelli di inquinamento dell’aria all’interno degli edifici. Per questo motivo è necessario scegliere prodotti d’arredo che vadano a contribuire nel minor modo possibile ai COV presenti negli ambienti interni. GREENGUARD è una certificazione di parte terza che analizza il livello di emissioni di COV per diverse tipologie di articoli tra cui anche i prodotti di arredamento. Tutti i materiali Nicos, sia solid surface che cast marble, hanno ottenuto la Certificazione GOLD di GREENGUARD, vale a dire sono ritenuti idonei non solo per ambienti interni comuni, ma idonei per ambienti frequentati da popolazione più esposta (anziani e bambini), che frequenta strutture sanitarie e scuole, visto il valore di emissione di COV praticamente pari a zero.

Most of people's daily exposure to chemicals occurs through the air we breathe in our homes, offices, schools and other indoor environments. These airborne agents are commonly referred to volatile organic compounds (VOCs). The products we use to build, furnish, but also clean our interior spaces can have a significant impact on indoor air pollution levels buildings. For this reason it is necessary to choose furnishing products that contribute as little as possible to VOCs present in indoor environments. GREENGUARD is a third-party certification that analyses the level of VOC emissions for different typologies of articles including furniture products. All Nicos materials, both solid surface and cast marble, have obtained the GOLD Certification of GREENGUARD, that is, they are considered suitable not only for common indoor environments, but suitable for environments frequented by the most exposed population (elderly and children), who frequent health facilities and schools, given the value of VOC emissions practically equal to zero.

Il bagno come luogo dove vivere il Benessere assoluto, in un rituale sospeso nel tempo e nello spazio. Questa collezione di vasche freestanding, è nata per regalare atmosfere suggestive, dove relax e intimità si accompagnano alle parole bellezza e design. Le vasche progettate da Nicos International sono realizzate in solid surface e Mineralmarmo®; tutte esprimono grande qualità produttiva e design esclusivo, con un attento studio del colore e con finiture superficiali che ricordano al tatto la pietra naturale levigata.

The bathroom is a place where we can experience total wellbeing and create rituals suspended in time and space. This collection of freestanding bathtubs was developed to create evocative atmospheres, where relaxation and intimacy go hand in hand with beauty and design. Nicos International's bathtubs are made of solid surface and Mineralmarmo®; all feature high quality manufacturing and exclusive design, along with carefully selected colours and surface finishes reminiscent of the touch of natural polished stone.

sanitari.

sanitary ware.

88 kapsel toilet

88 kapsel bidet

Kapsel è la prima coppia di sanitari in Solid Surface che unisce design rigoroso e alte prestazioni, ideale per ambienti bagno contemporanei e coordinati. Le superfici esterne verniciabili – toilet bicolore e bidet deepcolor – valorizzano il progetto con un colore pieno e uniforme, per un risultato estetico coerente ed elegante. Lo scarico Vortex da 4,5 L (Classe 2) garantisce un lavaggio efficace con consumi contenuti, compatibile con le principali cassette grazie al riduttore 4 step in dotazione. L'installazione è semplice e precisa, con corpo e tavoletta perfettamente allineati a filo. La bassa assorbenza del Solid Surface, rispetto alla ceramica, assicura maggiore igiene e facilità di pulizia. Garanzia estendibile fino a 5 anni.

Kapsel is the first pair of Solid Surface sanitaryware to combine rigorous design with high performance, ideal for contemporary, coordinated bathroom spaces. The paintable external surfaces –bicolor toilet and deepcolorbidet –enhance the project with rich, uniform colourfor a refined and cohesive aesthetic. The 4.5 L Vortex flushing system (Class 2) ensures effective bowl coverage with reduced water consumption and is compatible with the main concealed cisterns thanks to the included 4-step flow regulator. Installation is simple and precise, with bowl and seat perfectly aligned flush. Compared to ceramic, the low absorbency of Solid Surface provides greater hygiene and easier cleaning. Warranty extendable up to 5 years.

Linee essenziali e un ricercato studio della forma che incontra la luce per dar vita ad elementi d’arredo esclusivi. I lavabi sviluppati da Nicos International trovano origine nel vero design, dove l’estetica abbraccia sempre la funzionalità. Qui la materia resta protagonista, priva di ogni futile accessorio, ed è all’origine della forma stessa. Le qualità del solid surface permettono di dar vita a forme inedite, colori pieni, grande flessibilità progettuale, il tutto racchiuso nella grande solidità strutturale, anche negli spessori più ridotti.

Minimalist lines and an in-depth study of how shape interacts with light as a means of creating exclusive furnishing elements. Nicos International’s washbasins are rooted in true design, in which aesthetics always embraces functionality. The material reigns supreme, devoid of all trivial accessories, and plays a key role in the actual design. The qualities of solid surface enable highly unusual shapes and vibrant colours to be produced offering great flexibility in terms of design, all embodied within great structural solidity, even where thicknesses are reduced.

2 vasche | double bowl

The drawing shows a rectangular double bowl sink. The overall width is labeled 'L' and the overall height is labeled 'P'. Each bowl contains a drain with a central stopper. Above each bowl, there is a small circle representing a mounting hole.

- 210

slim

Le collezioni dei piatti doccia Nicos International sono state sviluppate con lo scopo di esaltare i sensi. Ogni dettaglio è disegnato per regalare armonia e integrare questo elemento in modo totalizzante nel design progettuale. L'impiego sapiente del Mineralmarmo® permette di creare finiture superficiali che giocano con il senso del tatto e ricreano gli effetti della pietra, del cemento, dell’ardesia. Qui la materia si plasma ai nostri desideri e si fa portatrice di stile, eleganza, carattere.

The Nicos International shower tray collections have been developed with the aim of enhancing the senses. Every detail is designed to create harmony and to fully integrate this element into the overall design concept. The skillful use of Mineralmarmo® makes it possible to create surface finishes that engage the sense of touch and recreate the effects of stone, concrete and slate. Here, matter is shaped according to our desires and becomes an expression of style, elegance and character.
